EDUCATION

Haldia Institute of Technology

Btech. In Information Technology

Haldia, India

Graduation, May 2027

- **Concentrations:** Software development
- **CGPA:** 8.93
- **Related Coursework:** Data Structures & Algorithms, Computer Organization & Programming, Operating System, Object-Oriented Programming, Database Management System, Computer Networks.

Deulia Hiraram High School

Higher Secondary Examination

Kolaghat, India

June 2021 – March 2023

- **Percentage:** 83% with Mathematics, Physics, Chemistry, Biology.

SKILLS

Languages: Java, Kotlin, Python, JavaScript, C, SQL, Bash.

Backend: Spring Boot, Spring Security, Spring Cloud, Spring AI, Hibernate, Apache Kafka.

Architecture: Microservices, MVC, RESTful APIs.

Frontend: React.js, HTML5, CSS3.

Databases: PostgreSQL, MySQL, MongoDB, Redis, Oracle.

DevOps & Cloud: AWS, Docker, Kubernetes, Terraform, Jenkins, Linux (RHEL/Ubuntu).

Tools & VCS: Git, GitHub, GitLab, Postman, Swagger.

IDEs: IntelliJ IDEA, VS Code, PyCharm, Android Studio.

PROJECTS

Jharkhand Bihar Updates

Haldia, India

Group Project ([Live link](#))

October 2025 – January 2026

- Developed a scalable regional platform using React.js and Spring Boot, aggregating real-time State News, Job Vacancies, and Community Events.
- Engineered a robust backend architecture using PostgreSQL for efficient data management, integrated Cloudinary for optimized media delivery, and deployed the scalable application on AWS EC2.

Airbnb Backend

Haldia, India

Solo Project ([GitHub Repo](#))

Jan 2025 – Mar 2025

- Developed a comprehensive hotel booking and management backend using Spring Boot, featuring like user authentication, dynamic pricing, and secure payment integration (Stripe). Key modules include room inventory management, booking and cancellation system, guest management, minimum price display, role-based access control, and admin control dashboard.

EXPERIENCE

ULMIND

Haldia, India

Founder and CTO

October 2025 – Present

- Founder & CTO driving the complete technical vision of the company while architecting and delivering scalable, cloud-native web solutions. Combining full-stack engineering with DevOps and AWS cloud expertise to build high-performance systems and lead the engineering team end-to-end.

TurnPikeAnalyst

Allentown, United States

Software Development Engineer Intern

Aug 2024 – August 2025

- Developed an AI-powered health and meal planning platform using Spring Boot, integrating LLaMA 3.2 for personalized meal generation, JWT authentication, PostgreSQL, Redis caching.

Achievements

- Smart India Hackathon Intra-College Winner.
- Solve 120+ Leetcode and 160+ GeeksforGeeks DSA problems.

Certifications

- **NPTEL Certification – Programming in Java (Silver)** Successfully completed a 12-week course conducted by IIT Kharagpur with an **84% score**, earning the **Elite certification**. Gained strong proficiency in Java programming, covering OOP, exception handling, multithreading, and more.
- **NPTEL Certification – Operating Systems (Elite)** Successfully completed a 12-week course conducted by IIT Kharagpur with a **69% score**, earning the **Elite certification**. Gained comprehensive knowledge of OS concepts
